

Webinar: *How the Cloud is Changing ERP*

Date and Time: Friday, April 16, 2pm EDT (GMT-4)

Learn how to automate more and pay less by using cloud ERP to automate business processes.

Cloud technology can deliver ERP systems more efficiently than traditional client-server methods. This helps businesses automate across offices, involve more people and organizations, and reduce the cost of maintaining systems. In this webinar you will learn the benefits, use cases, and potential pitfalls of implementing ERP on cloud technologies.

How the Cloud is Changing ERP
