Start Small, Think Big
Start with one user knowing OzLINK can grow with your company

Real Time Bar Code Scanning

Looking for greater efficiency in your warehouse? OzLINK Mobile brings it by gathering information at its origin and communicating it real-time with Acumatica.

OzLINK Mobile enables users to quickly receive purchase orders, and pick orders faster by leveraging bar code scanning and real time integration with Acumatica.

Order Picking

- Pick orders from a Mobile Device
- Direct user efficiently through the warehouse
- Verify correct items are being picked at the shelf
- Collect pick-from bin speeding order fulfillment

Receiving & Put-Away

- Quickly and accurately verify purchase order receipts on the dock
- Scan by UPC code, vendor code, or item number
- Easily move existing items between bin locations
- Know what has been received and on the dock, real time

Extend Acumatica

- Direct Acumatica integration eliminating complicated synchronization or manual reconciliation
- Intuitive user interface using same terms as Acumatica
- Leverage and extend defined order rules
