

anterra is Built for Construction

## Construction Dashboards + Reports for Acumatica

Anterra allows you to collaborate throughout your organization to consolidate reporting from project managers to executives in seconds. Empowering your construction jobs with the tools project managers will use to gain insights into job health and profitability.

Identify where your company or its divisions are making and losing money with AnterraBI, a cloud-based Business Intelligence (BI) platform for construction.

### **Empower your Finance and Executive teams with the ability to:**

- Monitor job margin gain/fade, cash position, and other risk factors
- Consolidate financials that drill to transactions
- Manage AR collections with no spreadsheet errors
- Combine Project Management and Accounting data
- Forecast cash flow

### **Manage the right KPIs for Project Managers and the field with:**

- Instantly customizable user dashboards and pivot-grids
- Ad hoc dashboards with Tableau, PowerBI, or QuickSight
- Fully automated WIP reporting
- Labor cost and productivity tracking
- Project Gantt charts

Look forward, not backwards! Replace the old, rear-view mirror vision of your company with AnterraBI™ Construction Dashboards and you'll always have a forward-looking 'windshield' view of your business.
