

Track all details of equipment and products installed at your customers' facilities by make and model

ASC's Equipment Management is a stand-alone module complementing Acumatica's Distribution & Manufacturing Suites, and the ASC Light Manufacturing module. Light Equipment represents a cost-effective alternative to Acumatica's Equipment Maintenance and is not dependent upon the Service Series module.

BETTER INFORMATION – A SINGLE, REAL-TIME VERSION OF THE TRUTH...

KEY BENEFITS

Tracks the installed Bill of Material and its serial number

BETTER INFORMATION

- Track and manage every detail of equipment shipped to your customers
- Tracks the installed Bill of Material and its serial number

A SINGLE, REAL-TIME VERSION OF THE TRUTH

- Light Equipment is your connection between order management, projects, CRM and inventory management, providing all the required information to track shipped equipment
- Better business insights and decisions result from the combination of automated processes, accurate data collection and financial analyses

Equipment maintenance inventory – Maintain all details of equipment and products installed at your customers' facilities by make and model and serial number.

Warranty tracking – Track equipment warranty (to prevent needless customer invoicing parts and labor when the work is covered under warranty).

Link to RMA Order – Returns are per RMA order with costs to repair captured within Light Manufacturing. Product disposition is updated in LE upon repair. If out of warranty customer is billed.

In the cloud and mobile – Built 100% in the Acumatica Framework. All applications are web-based, giving users with appropriate privileges unlimited access to the system from anywhere in the world.

LIGHT EQUIPMENT FEATURES AND CAPABILITIES

“As Delivered” Database	Tracks as Built/Delivered BOM(s) with updates to equipment in case of repairs or upgrades
Service Template	Create list of installations. Maintain installed equipment, serial number, and warranty.
Warranty Management	Establish warranties specifying the specific items under warranty to avoid confusion, mischarges, and objections. Warranties can be mixed -- for instance, a two-year warranty on part A and a one-year warranty on part B.
Invoicing	With Light Manufacturing capture and invoice for all parts and labor related to the repairs rendered. Can also charge parts and labor (as non-stock item) exclusively on Sales Order.
ADAPTABLE CLOUD	All applications are created for the cloud, which means that users with appropriate privileges can access the information from any device with a web browser or on native mobile apps.
DEPLOYMENT OPTIONS	Acumatica can be installed in-house or in a private or public cloud of your choice. Your deployment and pricing options are designed to ensure mid-market success.
CONNECTED CLOUD	Built for your business and can grow with your needs. Add capabilities such as CRM and data visualization. The flexible architecture allows for customization without the need for coding.
EASE OF USE	Staff and customers can collaborate easily and efficiently on Mac, PC, tablet, or phone. Use the built-in User Guide for self-paced learning as roles and requirements evolve.

ABOUT ADVANCED SOLUTIONS & CONSULTING CO.

Advanced Solutions & Consulting Co. (ASC) is a founding Acumatica VAR with MVP status. We deliver ISV solutions that save serious time and money for supply chain and accounting applications. Our solutions are written in native Acumatica xRP. They address complex ERP requirements extending Acumatica’s market breadth and competitiveness.

ASC augments Acumatica with elegant solutions that monitor and automate ERP functions to improve Acumatica’s competitive landscape and save customers (and their VAR’s) serious time and money.
