

Data Masons

PLANNING SCHEDULE AND PLANNING SCHEDULE RELEASE SUBSYSTEM

BENEFITS FOR DATA MASON'S EDI USERS

- Powerful management of planning schedule and release documents
- Flexible integration options into the ERP Platform
- Perfectly complements the other Data Masons EDI features such as ASN creation and compliance labeling
- Provides a basis for powerful reporting on planning schedules and releases

POWERFUL MANAGEMENT AND INTEGRATION OF 830/DELFOR & 862/DELJIT DOCUMENTS

Data Masons EDI provides one of the most powerful solutions available for managing and integrating the Planning Schedule and Planning Schedule Release document set (830/DELFOR and 862/DELJIT respectively).

The user is provided with a very simple yet powerful way to view, filter, sort and ultimately process records into the ERP. The four available options include:

1. Creation of sales orders
2. Creation of sales forecast to integrate into Master Planning/Master Scheduling
3. Creation of XML interface for user customization
4. Does not integrate the record

The power and simplicity of the solution will impress anyone that has dealt with these critical yet complex EDI business documents.

The Planning Schedule and Planning Schedule Release Subsystem is a perfect solution for companies serving the automotive and retail industries that commonly mandate those documents.
