

Fuuz™ from MFGx MES Solution

Whether you have an existing manufacturing execution system (MES) or want to build your own unique system, Fuuz' event-driven applications platform connects your industrial equipment to your operations in a single interface.

Get industry-specific customizable options and real time visibility into operations with Fuuz MES.

Functionality

Customize features and functions to meet your needs:

- Manage dispatch, inventory, track and trace
- Use the intuitive Operator Interface to create dashboards
- Manage product data
- Automate barcoding and label printing
- Design and pull reports
- Manage jobs capacity and work instructions
- Stream videos to your dashboards for real-time job visibility
- Operate with real-time production scheduling

Real Time Visibility

Fuuz MES gives you real-time visibility. It supports package definitions, co-products, and sequencing, and delivers lot-tracking and deep serialized traceability.

View metrics:

OEE/OAE | TECP | Shipping and logistics measures | Quality control | SPC

Move your existing MES to Fuuz or use Fuuz' built-in tools to design MES your way.

Fuuz™ is a cloud SaaS solution developed by MFGx, a Michigan-based software integration company, to connect multi-platform enterprise software, industrial equipment, operating systems, people and processes. For more, visit <http://www.fuuzplatform.com/>.
