

Fuuz™ from MFGx

EDI Integration

Connect with your trading partners securely and exchange all types of document formats, streamlining order entry, fulfillment, production and inventory. Fuuz' fully integrated iPaaS suite optimizes inbound and outbound EDI integrations. Configure the integration to meet your unique needs and comply with customer requirements.

Functionality

Fuuz gives you the EDI tools to:

- Onboard, set up and configure trading partners and suppliers quickly with intuitive integration
- Build custom document import and export flows and log all transactional data to handle exceptions
- Use the Document Designer to create/send/receive trading partner documents
- Integrate data with ERP or demand planning software and report on all EDI transactions
- Use Flow Designer for mapping options, especially when customer EDI requirements change
- Exchange all document styles, including industry standards such as Edifact, VDA, ANSI X12; handle complex data from any industry, including automotive in-line vehicle sequencing (ILVS) data
- Convert raw EDI data into JSON and map it specifically to your requirements
- Create error alerts, set EDI run schedules and trigger on-demand transactions

Fuuz™ is a cloud SaaS solution developed by MFGx, a Michigan-based software integration company, to connect multi-platform enterprise software, industrial equipment, operating systems, people and processes. For more, visit <http://www.fuuzplatform.com/>.
