

Your High-Impact ERP-HCM Integration

for better reporting, accuracy, and results.

Inova and Acumatica have partnered to offer a time-saving integration of industry-leading human capital management and financial software that streamlines employee data to Acumatica via automatic or push-button API.

With our all-in-one cloud-based HCM platform, you'll improve efficiency, accuracy, and visibility into your employee data. Make smarter decisions, boost engagement and retention, and ensure greater compliance with one database, one employee record, and one solution to manage your entire employee lifecycle.

Allow your information to flow freely to reduce the need for duplicate entries

- Eliminate extra work that comes from downloading multiple payroll reports from your HCM system and uploading them into Acumatica for GL posting each pay period.
- Save time with automatically synced cost centers from Acumatica, creating matching cost centers in payroll where your employees can clock in using the right location, department, project, and/or task.
- Improve accuracy with real-time employee data from Inova HCM to Acumatica for accurate allocation of labor expenses.

- Facilitate billable hours invoicing with employee time entries directly available in Acumatica.
- Eliminate the need to reconcile a large number of transactions by consolidating and summarizing payroll journal entries by cost center before syncing with Acumatica.
- Indicate Billable Y/N on Tasks that flow from Acumatica to Inova HCM.
- Increase Labor Item transparency with the option to drill into Sub Accounts.

How the Integration Works

Inova HCM		Acumatica
Branch Cost Center	←	Branch
Department Cost Center	←	Department
Project Cost Center	←	Project/Task
Cost Code Cost Center	←	Cost Code
Labor Item/Sub Account Cost Center	←	Labor Item/Sub Account
Billable Cost Center	←	Billable Y/N Indicator on Task
