# nectari

PRODUCT SHEET
Nectari for Acumatica

Get the most out of your Acumatica data with Business Intelligence and Data Management.

Supercharge your organization's insights with Nectari Business Intelligence, a complementary solution that elevates your Acumatica analysis and reporting experience. Discover the benefits of Nectari's robust BI capabilities.

Make better decisions, faster

Analyze your Acumatica data and empower all users to make data-driven decisions with the help of our built-in AI assistant, Nectari AI Copilot. Access prebuilt reports or build your own and customize them with easy-to-use features like filters, pivots, ranks, and KPIs. Nectari AI Copilot can also suggest the most impactful visualizations and formatting to help you present your insights effectively. View your data in the most meaningful way, with over 100 visualization options and flexible formatting, ensuring your reports and dashboards communicate exactly what matters.

Acumatica The Cloud ERP

Get access to all your data

Manage data from multiple sources with Nectari's extract, transform, load (ETL) tool, DataSync. Reduce the time and costs of additional labor or tools for prepping or cleaning data. Migrate data from legacy or third-party systems, consolidate data between disparate databases, and centralize data into a data warehouse.

Empower all users

Nectari empowers all employees, technical and non-technical, by removing reliance on IT for reports and insights. With its AI Copilot, it analyzes data, explains both what happened and why, and delivers plain-language insights into trends, changes, and variances. Offering targeted recommendations on what to explore and how to present findings, users can quickly create views, manipulate data with filters, pivots, ranks, and KPIs, and visualize results through over 100 charts with advanced calculations, all guided by AI for faster, smarter decisions.

Keep your data secure

Manage granular security options from a central location and implement them across individuals or groups. There's no need to create multiple copies of the same report, as each user will only see the data they have been granted access to.

Collaborate with colleagues

Quickly share the right information with all stakeholders by emailing, exporting, printing, and sending an external link to the report you want to share. Benefit from advanced distribution features such as conditional alerts, data security, reporting packs and more.

Why Nectari for Acumatica

Self-Service BI: Empower business users with intuitive drag-and-drop tools to create, customize, and analyze reports without relying on technical expertise.

Pre-Built Analytics: Get started quickly with a suite of ready-to-use dashboards and reports designed to address common business needs right out of the box.

Excel-Like Reporting: Enjoy the familiarity of Excel-style formatting and functionality, enabling users to create polished, flexible, and professional reports with ease.

Multi-Datasource Access: Seamlessly integrate data from multiple sources, including Acumatica, to build comprehensive insights across your organization.

Nectari AI Copilot: With Nectari, AI turns complex data into clear, actionable insights, guiding you to focus on what matters most: applying expertise, asking the right questions, and making confident decisions.
