

Container Builder Module

Automate container packing. Save time. Ship smarter.

1 Set your container details

2 Fill your containers

3 Summary comparison

4 Capacity details

	Current	Proposed	Δ Difference
Line count	839	1,161	322
Order units	106,683	147,476	40,893
Order value	2,101,356	3,181,743	1,080,387
Order volume (m³)	553.0	780.2	227.2
Order weight (kg)	118,484.7	164,509.0	46,024.4

With a single click, automatically turn your Netstock recommendations into shipment-ready supplier orders: optimized for space and real-world constraints before you hit “send.”

What this means for you

Lower freight costs

Maximize container utilization and avoid shipping unused space

Shipment-ready orders

Build orders that already fit container limits, no manual rework required

Smarter product mix

Ensure the right items are included in every shipment

More control

Optimize orders based on cost, margin, and efficiency priorities
