

Expiry Dates Module

Manage expiry. Less waste. More profit.

The Expiry Dates Module makes managing perishable stock simple. It keeps inventory accurate, automatically removes expired items, and ensures replenishment stays on track.

The result? Smarter inventory management that reduces spoilage and protects margins.

Unlock these benefits

Protect profits

Use stock before it expires to protect margins

Real-time accuracy

Expired stock is auto-deducted from inventory

Smarter replenishment

Recommended orders adjust automatically to prevent lost sales

Zero manual effort

Automation saves time and prevents errors
