

Excess Redistribution

Eliminate excess stock and frustrating shortages across multiple warehouses

Say goodbye to inventory imbalances with Netstock's Excess Redistribution functionality. With just a few clicks, you can take control of your inventory management across multiple locations.

Redistribution potential			
Location	Product count	Quantity	Value
Turnerville	48	3,964	153.0k
Mississippi	61	2,675	72.0k
East Fred			

Mississippi		
Product	Source Location	Status
Concrete coat	West Boyceview	Excess stock
Lamp	North Jeffrey	Excess stock

Excess Redistribution quickly puts the decision back in your hands

This innovative functionality analyzes inventory levels across multiple locations, identifies surplus stock, and allows you to seamlessly redistribute stock to where it's needed most. You have the flexibility to transfer surplus stock seamlessly between locations, whether it's from one location to many or from many locations to one. Once you've selected the destination, an automated transfer order is created in your ERP.

Unlock real value with Excess Redistribution

No more manual tracking or guesswork! Say hello to reduced spend on supplier orders, increased working capital, and increased sales!

- ✓ **Unlock cash:** Utilize existing inventory to cut procurement costs and increase profitability. By unlocking working capital, you can invest more in growing your business.
- ✓ **Maximized sales opportunities:** Preventing excess stock and minimizing stock-outs ensures you never miss a sales opportunity, boosting your ROI.
- ✓ **Efficient replenishment:** Get stock where it's needed faster. By quickly replenishing to locations facing shortages, you minimize downtime and keep customers satisfied.
