

RISE ABOVE THE CLOUD WITH

ProMRO
MAINTENANCE, REPAIR & OVERHAUL CLOUD ERP

SILOS. GOOD FOR GRAIN, BAD FOR BUSINESS

Most repair businesses battle “silos” every day. In one “silo”, everything is perfect, and the future is rosy. Every job is profitable and on-time. In another, there’s storm clouds and imminent failure which bleed profits from your business. Finally, you find yourself scaling the walls of each “silo” to get an overall picture of the financial health of your business.

Breakthrough the Silos

ProMRO is designed to breakdown the “silos” within your business to give you an accurate picture of your Maintenance, Repair or Overhaul business. Since it is a single integrated application you can ditch the labyrinth of spreadsheets that is gluing the “silos” together and begin to systematize important aspects of your business.

ProMRO is built upon an award winning easy to use cloud ERP solution that you can grow with.

NO MORE SILOS.

THE REAL VALUE OF *ProMRO* IS THE CONNECTION

BEGIN WITH A QUOTE

With *ProMRO*, you start with a quote – this will create visibility of your interactions with prospects, so your pipeline is visible.

EASY TO USE TEMPLATES

This enables you to quickly quote new work, with tracking revisions to minimize any confusion regarding the approved scope.

CLEAR SCOPE OF WORK

The approved quote becomes the basis for the shop work orders to clearly show the scope of work. Additions are easily quoted, amended and tracked to the job.

SUPPORT DOCUMENTATION

Photos, videos and other documentation can be added to help support the proposed scope of work.

CLOSELY MONITOR JOBS

Easily monitor all active jobs and identify problems before they become a drain on your business. Problems caught early are easier to correct and will improve your profitability.

CONVERT TO INVOICE

Lastly, the shop order becomes the basis for the invoice. The invoice is sent, the receivables are updated, ledger entries created, and the loop is closed.

VISUALLY MANAGE

Dashboards and graphical displays highlight the important activities in your business. Time saving drill downs enable you to efficiently find the source transaction without combing through pages of detail.
