ADC Solution Overview

Optimizing Supply Chain Performance

© 2015 Savant Software, Inc.
Unlike most automated data collection (ADC) solutions that have evolved from technology integrators with often little or no industry expertise, Savant ADC was developed by supply chain professionals who have worked with global distribution and manufacturing companies in the design and implementation of warehouse automation.

CLICK TO REQUEST A DEMO

**AFFORDABLE, LICENSED-BASED PRICING STRUCTURE**
Easily add more users as your company grows. 0% financing options available.

**CUSTOMIZABLE, SINGLE CODE SET**
Flexible system that can be configured based on your unique business processes. Eliminate rip and replace scenarios—simply enter in a new license key to upgrade to a full WMS.
Designed to help grow small and mid-sized manufacturing and distribution companies.

Savant ADC decreases manual operations, eliminates paperwork and reduces operational costs by increasing the accuracy and speed of warehouse functions like receiving, putaway, inventory counts, inventory moves, picking and shipping. By improving operational efficiencies, Savant ADC enables your organization to gain a real competitive advantage.

For small and mid-market companies, cost and time are serious concerns when implementing a new automated solution. Savant ADC has multiple pricing models to fit every budget. It is also easy to install, easy to configure and easy to use. Your warehouse staff will be up and running quickly with minimal disruption to your daily operations.

"THE GOAL WAS TO CREATE A SOFTWARE PLATFORM THAT NOT ONLY INCORPORATED FEATURES AND FUNCTIONALITY BUT ALSO DEALT WITH THE PROBLEMS ASSOCIATED WITH DEPLOYMENT."

CHRIS JACKSON, PRESIDENT SAVANT SOFTWARE

EASY TO INSTALL AND USE
Partner with an authorized implementation specialist or do it yourself, Savant provides the documentation and training tools to get you up and running quickly and at minimal cost.

SCALABLE SYSTEM WITH AN UPGRADE PATH
Start with our ADC solution and add functionality to seamlessly evolve into a WMS as needs change.
Land and expand is a concept where you purchase or “land” on the system that fits your needs and budget today, then expand or grow into the system that you need for tomorrow. Savant provides a robust upgrade path from its ADC entry level warehouse automation solution to a feature rich WMS. Unlike our competitors which force you to rip out one system and replace it with a completely different one, Savant’s upgrade path only requires entering a new license key which expands the system’s capabilities. This unique strategy greatly reduces the cost of upgrades and training, and extends the life cycle of the solution.

Easy to learn
Easy to use
Easy to expand
“It’s refreshing to be working with experts, questions are responded quickly with straight answers, no BS, decisions get made quickly because we are confident in the information exchanged. The software interface is obviously designed by people who get it, as in people who actually understand the challenges of a warehouse operation in a physical world. The interface is straightforward, makes sense to a warehouse employee, and easy to use.”

Randy Chen
Ming Hong International
Dynamics NAV

“Sierra Nevada Brewing selected Savant Software in 2007 as our Supply Chain partner. During the past six years, Savant has accomplished numerous phased implementations and upgrades. As part of the recent expansion to Asheville NC, we reviewed our supply chain operations and chose Savant Software to continue providing the system and support, including a Best Practices review and SOP recommendations for our joint operations. Savant has proven to be a valuable partner in the past and will continue to be an important part of Sierra Nevada Brewing’s future.”

Bill Bales, CFO
Sierra Nevada Brewing

FEATURES

- Role Based Security
- Customizable Menus, Toolbars and Grids with Sorting and Filtering
- Standard Interface to Many Leading ERP Systems
- Detailed Transaction, Audit and Productivity Reporting
  - Manage Inventory Movement
  - Inventory Adjustments
  - Full Pallet and Item Picking
  - Multi-Language Support
- Integration into Savant’s Other Supply Chain Modules
  - Crystal Reporting
  - Inventory Receipts
- Supports Both Physical Inventories and Cycle Counts
  - Directed Picking
  - Pick to Pack

With a Zebra enterprise mobile computer in hand, workers can access the information, applications and people they need to get the job done. The result? Productivity is up. And your customers experience the best service possible. When you choose Zebra, you’re in good company. The world’s largest retailers, manufacturers, transportation and logistics companies, field sales and service organizations, and healthcare providers rely on Zebra mobile computers every day to turbocharge their business.

Whether your workers need access to simple data applications or a live video feed, Zebra mobile computers have the power to make it happen. Zebra’s latest mobility platform includes some of the fastest processors and the large mobile memory capacity to support the most demanding applications. And best-in-class battery management preserves power for full shift operation, every moment your mobile computers are not in use.
