

BOM, Packaging Formula

BOM (Bill Of Material) function is to manage your packaging in Acu Process Manufacturing (APM). You can define BOM for finished product or use for assembling the product packs. Accurately track your costs of finished goods and protect your bottom lines. Acu Process Manufacturing is tightly integrated with core Acumatica functions to give you seamless user experience.

PRACTICAL FEATURES

Acu Process Manufacturing allows you to define BOM for your intermediate items, finished goods and package assembly in one simple screen.

You can specify Finished Goods, Labor, Equipment, SOP and Instructions while defining the Bill Of Material along with associated costs.

Keep track of your costs accurately and compare planned vs actual costs to help improve your production processes.

KEY BENEFITS

FLEXIBILITY

- Ability to define finished product or assembly BOM gives you the advantage of managing your formula repository efficiently
- Being able to plan batch size and fill level in advance helps better planning
- Either insert SOP within the formula steps or maintain separately with version control adds to robustness

SECURITY

- Limit the visibility, limit the ability to Edit the BOM such that your formula is safe & secure

VISIBILITY TO COSTING

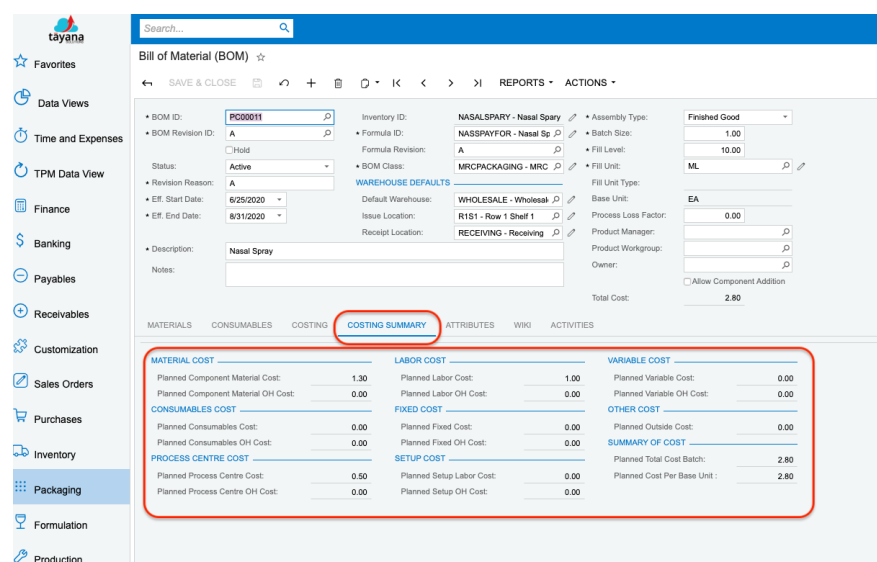

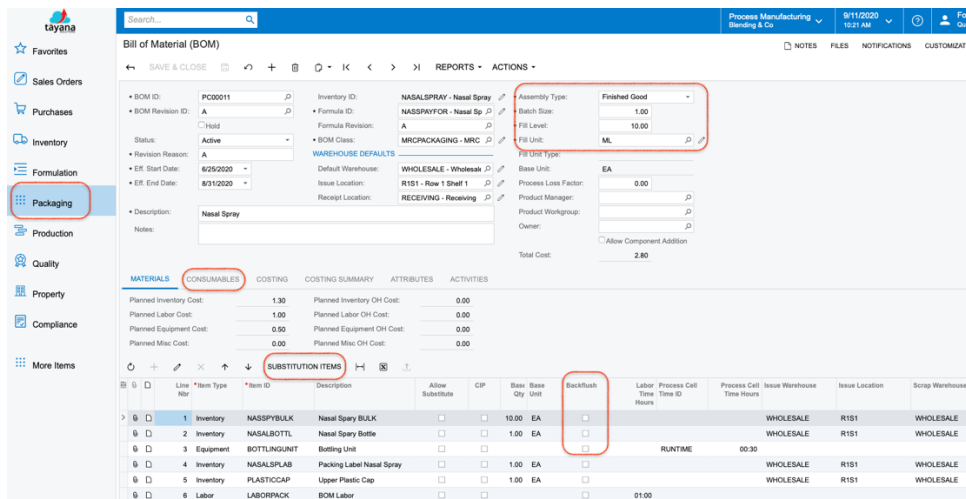

- Get high visibility to every possible costs associated with the BOM and control your costs well in advance

COLLABORATION

- Exchange emails, schedule meetings from within the system such that record all the activities that went behind finalizing the formula

ONE SYSTEM

- Record everything in one single system helping you access data seamlessly
- Build Analytics easily to monitor the health of your system
- Manage your business at your fingertips

FEATURES AND CAPABILITIES

BOM Type	There are three type of BOM- finished goods, assembly, intermediate
Revision Management	Acu Process Manufacturing allows you to define multiple revisions of the same BOM. You are allowed to use any version or revision
Dynamic Component Addition	Acu Process Manufacturing gives the freedom to add more elements or components which were not predefined in BOM
Component Substitution	You can substitute a component in case you fall short of originally suggested component
Approval Workflow	Single or multi-level approval workflow which can be defined in an approval or assignment map
Backflush	Automatic posting of material, equipment, labor costs allowed. Eliminate manual entries to save time.
Consumables	If you do not wish to include consumables in the raw materials section and maintain separately, APM allows you to achieve this. The cost of consumables is calculated as part of the production cost
Custom Fields	Acu Process Manufacturing allows you to add as many custom fields (Attributes) at will
Data Analysis	Comes with several built-in Reports and Inquiry Screens to analyze your data. APM allows you to create your own custom reports easily
Setup Costs	You can define various setup costs to capture machine, labor and other overheads related to setting up
Fixed Costs	You have the flexibility to account for labor or other overheads that are fixed costs of production
Document Management	Acu Process Manufacturing comes with integrated document management feature using which you can create and maintain documents related to specific BOM which can be accessed at any time during production
Costing Analysis	Define various costs associated with the BOM and accurately predict and track the costs of production

About Tayana Solutions:

Tayana Solutions provides end-to-end software consulting, ranging from eCommerce, Production, Quality, Regulatory Reporting to Customization. We specialize in Process Manufacturing domain catering to their unique set of demands that is not understood by general manufacturing products. Contact us if you are in search of a compassionate & reasonable service provider to experience the benefits of digital transformation.

THE ACUMATICA ERP DIFFERENCE

Acumatica delivers a full suite of integrated business management applications unlike any other ERP solution today

STREAMLINE OPERATION

Manage your business more efficiently:

- Automate processes
- Control workflows
- Access the system from anywhere on any device, including mobile
- Promote collaboration with all-inclusive user licensing

ADAPTABLE SOLUTION

Add and Extend:

- Deploy in-house or in a private cloud or public cloud
- Easily configure your solution to fit your needs
- Add capabilities such as CRM or data visualization at any time
- Extend to other solutions and applications beyond ERP

YOUR BUSINESS ACCELERATED

Get a single version of the truth:

- Accelerate business performance and make smarter decisions with automated processes, real-time data collection, financial analyses, and forecasting
- No per user pricing – system scales as your business grows
