

# Professional Services Edition:

## Your Projects Run Better When You See What's Next.

In professional services, sustained performance stems from anticipating delivery challenges before they arise. Leaders need clarity into emerging risks, shifting scope, and resource pressure early enough to protect margins, commitments, and client outcomes.

Acumatica Professional Services Edition is a best-in-class cloud ERP for project-driven firms, unifying project management, project accounting, and resource management with financials, time and expense, client management, and reporting. It delivers trusted visibility into delivery and business performance. ERP shows what happened. That is where TrueProject adds the advantage.

TrueProject's *Strategic Project Intelligence* (SPI) reveals what's forming next, so leaders see delivery pressure early and act before outcomes shift. TrueProject for Acumatica ERP provides professional services firms with what they need going forward: ERP execution, **plus AI-driven predictive delivery intelligence**.

## Why Professional Services Teams Choose Acumatica

Acumatica sets the benchmark for enterprise ERP in professional services firms, bringing finance, delivery, and client expectations together into a single, connected foundation. With Acumatica, teams gain:

**01**

Project accounting and billing control tied to delivery and financial outcomes

**02**

Resource and project management to support utilization and delivery planning

**03**

Time and expense capture with real-time visibility into project performance

**04**

Embedded CRM that connects opportunity, customer context, and delivery execution

Acumatica becomes the ERP system of record for service delivery and business performance.

# Where TrueProject's Predictive AI Becomes Essential

Acumatica provides trusted ERP visibility into project and financial performance. TrueProject's *Strategic Project Intelligence* (SPI) complements that foundation with predictive oversight by interpreting execution signals and stakeholder engagement in context. TrueProject's SPI helps leaders:

Detect early risk indicators and confidence shifts

Identify which projects need escalation, support, or course correction first

Reveal delivery strain before client satisfaction declines

Strengthen governance without disrupting ERP workflows

ERP confirms what happened. Predictive AI reveals what is likely to happen next.

## TrueProject for Acumatica ERP Offers ERP Control with Forward-Looking Project Delivery Insight

Acumatica provides trusted ERP control across delivery, billing, and financial performance. TrueProject's SPI adds forward-looking insight into execution momentum and stakeholder alignment. Together, leaders gain:

Earlier visibility into delivery pressure and confidence shifts

More precise alignment across delivery teams, leadership, and clients

Smarter prioritization of attention across the project portfolio

Stronger governance without disrupting ERP workflows

The result is not more reporting. **It is clearer timing and stronger decisions across every engagement.**

## Start With TrueProject SnapShot

Get AI-driven executive-ready project insights within 48 hours. No cost, no commitment, and no IT lift required. TrueProject SnapShot helps leadership identify where delivery pressure is building, allowing teams to act early.
