

EXPERIENCE TRUEPROJECT – FREE, FAST, AND WITHOUT OBLIGATION

RECEIVE CLEAR, ACTIONABLE AI-DRIVEN INSIGHTS IN JUST 48 HOURS. NO SOFTWARE. NO SETUP. NO COMMITMENT.

OVERVIEW

WHY THIS MATTERS

In construction, margins are thin. Timelines are tight. And risks don't wait to appear in dashboards – they quietly erode profit before traditional tools can react.

TrueProject for Construction gives you a fast, no-setup, **AI-driven Strategic Project Intelligence** to expose risks before they impact cost, delivery, or reputation.

Don't you want your project off on the right foot – with a real-time communication loop that keeps it on track from day one?

The biggest impact happens in the first 25% of the project. That's where TrueProject shines.

THE CHALLENGE

A VISIBILITY GAP

Most construction oversight is reactive. KPIs and dashboards confirm failures – but provide little insight into risks before they escalate.

The result?

- ⚠ Risks surface too late for action
- ⚠ Cost and schedule overruns emerge without clear warning
- ⚠ Margins drop, accountability blurs

With margins often within 3–5%, the lack of predictive visibility easily wipes out project profits.

THE OPPORTUNITY

WHAT SUCCESS LOOKS LIKE

With TrueProject's **AI-powered predictive visibility**, you don't just fix problems – you prevent them.

That means:

- Protecting profit with early warning signals
- Faster billing with fewer delays
- Fewer owner/sub disputes through early intervention
- Greater trust and transparency that drives repeat work

This isn't just project management. This is **AI-enabled project defense**.

THE SOLUTION

HOW TO GET STARTED

The **TrueProject SnapShot** – an AI-integrated quick, no-cost project health analysis that reveals overlooked risks and critical performance gaps in your project environment, built on *Strategic Project Intelligence*, it delivers data-verified foresight without IT setup or software installation – in just 3 easy steps:

01

Select Project

Choose the project you would like to have analyzed through TrueProject SnapShot.

02

Share Input

A TrueProject Customer Success Manager personally interviews you + PM and Field Supervisor just 20 minutes each.

03

See Results

Get two executive-ready reports – yours to keep, no obligation

- An **AI-powered Project Summary** with early warning indicators, trending analysis, and fix-first recommendations
- A **CPVR (Construction Project Value Realization)** report showing risk signals, margin threats, and opportunity areas

This isn't just reporting—it's prevention. You'll know what's coming before it derails the project.

THE ROAD AHEAD

CHOOSE YOUR PATH

Once you've seen the value of **TrueProject SnapShot**, choose the path that best fits your projects.

TrueProject Software as a Service

Software subscription for organizations to ensure results with predictive insight.

- Software you manage, we onboard
- Predictive AI engine + your PM/field data
- Real-time dashboards and alerts

TrueProject SnapShot Service

Continue uninterrupted with an annual SnapShot subscription.

- Individual project analysis (no tools needed)
- Unbiased executive-ready insights monthly
- Project and snapshot selection flexibility

TrueProject Insight as a Service

A managed service subscription. We do the work, you get the insights.

- You are hands-off, we run the analysis
- Weekly dashboards + exec briefings
- Ideal for overloaded teams
