

Testimonials

"With this software we are able to schedule and provide service to our customers in the most efficient method possible. Our operators are able to increase the number of customers being serviced per day by an additional 30% per vehicle. It reduces our driving time, our mileage, and fuel consumption, while providing detailed information to the driver. If you are involved in planning or routing multiple stops in your business and it is important to you to manage time, fuel economy, or have the ability to accurately predict when you will arrive, then you need to check this out. Cost effective, helpful, amazing customer service. Thank you!"

- Ron Meeres, Manager, Vecova Bottle Depot

"Routing has never been easier and faster. Importing information onto WorkWave Route Manager saves hours which saves \$\$\$! 4 Mouse clicks and the job is done."

- Brandon Vanden Eykel, Inside Sales & Logistics, Qualitree Propagators Inc.

"With WorkWave Route Manager, I know we are driving more efficiently, spending less time driving, and we are making less mistakes. My drivers are less frustrated and my customers are happier because we are there faster. Even our best drivers, who know the routes well, are benefiting from it. There are a zillion routing solutions out there, I looked at a bunch. Short of a UPS solution - I found WorkWave Route Manager to be the fastest, the one with the most accurate geocoding and the best route optimization."

- Jon Ove, Owner, Century Springs

ROUTING TIME

"WorkWave Route Manager has cut our routing time down to just a 1-2 hour task per day. The functionality has made it so I'm able to customize each day enough that I can train anyone in warehouse to be able to do the routing in my place, which gives me more time to focus on bigger projects."

- Jonathan Snell, Assistant Operations Supervisor, SPUD

"Without WorkWave Route Manager, we would be spending much more on gas and wages. It has helped us streamline our scheduling and dispatching. Honestly, we have looked at the competition only to find there currently is none."

- Joshua Jones, Lead Dispatcher, Metalink Technologies
