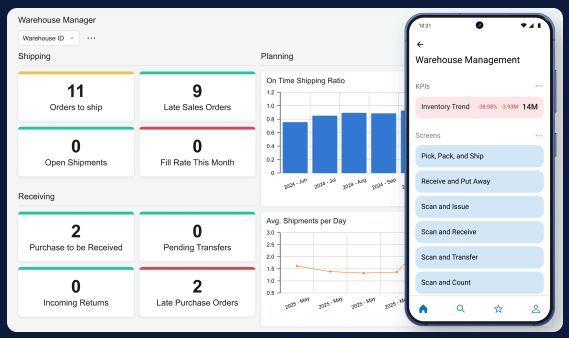
# Warehouse Management System (WMS)

## Streamline warehouse operations with barcoding and mobile data entry from any location.

Minimize data entry errors with barcode scanning, automate pick, pack, ship, put-away, and physical inventory from mobile devices, and track operations with role-based dashboards for warehouse, receiving, and shipping teams.



## Streamline fulfillment, reduce errors, and increase warehouse productivity

Warehouse Management automates operations using barcodes and native mobile apps for faster and more accurate inventory transactions. Know what is happening across your facilities, including stocking levels, costs, and warehouse activities. Acumatica WMS works seamlessly with Inventory Management, Sales Orders, Purchase Orders, Service Management, and Production Management with Manufacturing Data Collection.

### Get every order right

- Avoid costly returns: scan lot and serial numbers and verify picks to eliminate over-shipments, under-shipments, and incorrect items
- Automate picking, packing, receiving, put-away, transfers, and physical counts with customized workflows that keep workers from skipping steps and reduce training costs

### Pick and pack faster

- Paperless directed picking with prioritized queues for single or multiple orders, using wave or batch picking
- Unit-of-measure picking across bulk, case-pick, and fast-pick zones
- Flexible location definitions that help workers quickly find items in specific aisles, shelves, and bins
- Labels from package weights, or system-determined packaging

### Ship with fewer surprises

- Rate shop with the lowest-cost services first and clear signals for which meet the requested delivery date
- Review suggested EasyPost address corrections in Acumatica before labels print
- Marketplace apps for freight, tracking, and EDI, including 856 ASN, 850 Purchase Orders, and 810 Invoices

## Key business benefits

**Automate inventory transactions** for improved data accuracy.

**Optimize warehouse and retail operations** with inventory turnover insights.

**Reduce fulfillment cycle times.**

**Manage your business** with role-based dashboards for warehouse and purchasing managers and shipping and receiving clerks.

**Use an automated, streamlined process** for improved pick, pack, and shipment accuracy.

# Capabilities

From receiving and put-away through picking, packing, and shipping, every step runs on the same inventory record.

## WAREHOUSE SETUP

### Warehouse Locations

Configure rows, aisles, shelves, and bins, and use ABC classifications to guide storage.

### Carts and Totes

Use carts and totes for paperless picking and put-away, adding totes on the fly.

## RECEIVING AND INVENTORY

### Directed Put-Away

System-guided put-away reduces errors and accelerates receiving.

### Stock Movement

Support warehouse transfers and inbound transfer receipts across geographically dispersed locations.

### Physical Inventory

Use mobile apps for cycle counts and other physical inventory activities to ensure inventory accuracy.

### Stock Turnover

Identify slow-moving stock and refine replenishment with the turnover ratio inquiry.

## PICKING

### Paperless, Directed Picking

Prioritized picking queues guide workers on mobile devices or rugged scanners.

### Wave or Batch Picking

Generate wave or batch pick lists based on the best path for each available picker.

### Picking Zones and Strategies

Allocate pallet, case, and each quantities automatically across bulk, case-pick, and fast-pick zones with unit-of-measure based picking.

### Flexible Quantity Entry

Scan unit by unit, require manual entry, or prepopulate the requested quantity—with lot, serial, and expiration validations in force.

### Barcoded Pick Lists

Barcodes speed up picking and prevent picking items not included in the order.

### Bidirectional Picking

Implement bidirectional picking and aggregate quantities for pick lines.

### Change Picking Locations on the Fly

Let staff change item locations during picking to accommodate real-time inventory movements.

## PACKING

### Packing Definition

Provide adequate packaging size and materials to ensure safe transportation and handling.

### Packing Automation

Capture items, lots, and serial numbers by barcode. Integrate digital scales and printers to weigh and print labels and packing slips automatically.

## SHIPPING

### Shipment Creation

Create UPS, FedEx, and USPS shipments through EasyPost and ShipStation API, plus Marketplace apps for LTL and other carrier systems.

### Rate Shopping

See lowest-cost services first, with clear signals for which meet the requested delivery date.

### Shipping Labels and Documentation

Automate labels and packing slips for each shipment, and review suggested EasyPost address corrections in Acumatica before labels print.

### Customer Notifications

Notify customers with carrier tracking links when shipments are processed, and alert them when backordered items are ready to ship.

## INSIGHTS

### Role-Based Dashboards

Real-time drilldowns into shipments, receipts, on-time shipping, fill rates, late orders, and productivity for warehouse, purchasing, shipping, and receiving roles.

### Alerts and Anomaly Detection

Exception-based alerts help managers identify issues sooner and keep warehouse operations moving.

### Warehouse Efficiency

Gain insights into warehouse labor activities with the Pick/Pack Efficiency Inquiry.

### Side Panels

Direct access to vendor, item, and order details from sales orders, shipments, purchase orders, receipts, and item maintenance.

## OPTIONAL

### Optional User-Defined Labels

Create linear or 2D data matrix labels with part numbers, lot and serial details, and expiration dates using the connected Asgard Label application.

## ABOUT ACUMATICA

Acumatica Cloud ERP is a comprehensive business management solution that was born in the cloud and built for more connected, collaborative ways of working. Designed explicitly to enable small and mid-market companies to thrive in today's digital economy, Acumatica's flexible solution, customer-friendly business practices, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
