

Unleash Cash Flow with Embedded Payments

Simplify, Secure, and Succeed

Boca Terry | Acumatica Customer

Streamlines financial operations with fully integrated payment processing that enhances cash flow management, reduces manual data entry, and improves accuracy with automated reconciliation.

Flexible Payment Methods

Accept all major payment types—credit and debit cards, ACH/EFT, checks, and digital wallets like Apple Pay and Google Pay. Automate recurring and balance-due invoices, and support gift or loyalty card programs. Lower transaction fees, improve cash flow, and provide a seamless, flexible payment experience that meets customer expectations.

Modern Payment Vehicles

Engage customers with a diverse range of payment vehicles. Reduce transaction fees by accepting in-person card payments, smart cards, and contactless payments. Authorize remote personnel to accept mobile payment on any iOS or Android device. Embed payment links directly into invoices, and empower customers to pay invoices through the self-service portal.

Built-in Security and Compliance

Integrated Acumatica payments protect sensitive data with robust security. Tokenization secures payment details to help mitigate fraud. Encryption safeguards data at rest and in transit. Role-based security protects data from unauthorized users. No VPN needed—just trust, compliance, and peace of mind.

Efficient Back-Office Processing

Streamline financial operations with automated settlement, reconciliation, and recurring invoicing. Manage partial payments, reserve payments, expiring cards, and gift or loyalty programs with ease. Comply with surcharge regulations and leverage Level 2 and 3 processing to reduce costs, boost accuracy, improve efficiency and maximize cash flow.
