

Unleash Cash Flow with Embedded Payments

Simplify, Secure, and Scale
Your Payment Processes

Clive Coffee | Acumatica Customer

Acumatica Payments is a fully integrated payment solution within the Acumatica ERP cloud platform that automatically connects to banking networks, providing organizations with a secure, compliant, efficient, and cost-effective solution to manage customer payments. It streamlines every aspect of your payment lifecycle to reduce errors, improve cash flow, and increase operational efficiency.

Let's take a closer look at all 4 Payment Pillars

Flexible Payment Methods

Payment Pillar #1

Flexible Payment Methods

Accept all major forms of payments, including credit cards, debit cards, checks, and Automated Clearing House (ACH) payments from all primary banking networks (Visa, Mastercard, American Express, Discover) ensuring you never miss a sale due to limited payment options.

Enhance customer engagement, foster loyalty, increase revenue streams, and drive repeat business by leveraging gift cards where customers can benefit from unused card balances, manage refunds, or run promotions.

“Acumatica Payments allows us to confidently process our credit cards without the constant fear of data corruption from the integration. It saved countless time reconciling transactions with the automatic Settlement Batch Imports built in Acumatica.”

– Jeff Foster, VP Operations, West Coast Turf

Payment Pillar #2

Modern Payment Vehicles

Enhance customer satisfaction by offering customers a diverse range of payment vehicles. Lower transaction fees by accepting in person card payments, including magnetic stripes, smart cards, and contactless payments. Equip field service and remote personnel to accept mobile payments anywhere, anytime, on any iOS or Android device. Embed payment request links directly within digital invoices, and sales orders requiring prepayments, and empower customers to view and pay multiple invoices simultaneously, manage their account, and store preferred payment methods.

“We knew Acumatica was a solution that we could grow with. We knew that it wasn’t going to limit us to what we could do. There is a lot of possibility for Clive and how we want to continue to expand.”

– Amanda Datte, CFO, Clive Coffee

Payment Pillar #3

Built-in Security and Compliance

Built in robust security features safeguard sensitive financial data and ensure every transaction is secure. Advanced features such as data encryption, tokenization, and transmission security protect payment information from fraud and breaches. Role-based user security adds additional protection by limiting access to authorized personnel, giving businesses peace of mind while managing payments.

Additionally, Acumatica streamlines operations with automated settlement and reconciliation processes, reducing manual effort and improving cash flow. Security protocols extend to mobile payments on any device. These measures provide businesses and customers with confidence in every transaction.

“Acumatica has given us a robust eCommerce solution to keep us on the cutting edge. We have the flexibility and data access that we need to scale our business as we grow, and to identify and resolve potential problems to our customer’s satisfaction quickly.”

– Ethan Platt, President, American Meadows

Payment Pillar #4

Efficient Back-Office Processing

Transform your back-office operations with advanced capabilities that empower your team to optimize workflows, eliminate manual tasks, and drive exceptional financial performance across the board. Automated settlement and reconciliation take the hassle out of tracking merchant fees and deposits, minimizing errors and saving valuable time. Improve cash flow by streamlining collections for recurring payments and proactive handling of expiring credit cards.

The platform also supports reserve payments for future deliveries or partial shipments, all while ensuring full compliance with surcharge regulations. Maximize additional savings with Level 2 and Level 3 processing on business-to-business and business-to-government payments.

Summary

Optimize Payments, Maximize Profit

It enhances cash flow and operational efficiency by offering customers flexible payment methods, modern payment vehicles, advanced built-in security and compliance, and features designed to improve organizational efficiency and profitability. Businesses can accept a wide range of payments, offer mobile and contactless options, and embed payment links in invoices. Robust security features such as encryption and role-based access safeguard payment information from fraud and breaches. Automated reconciliation, recurring payment management, support for level 2 and level 3 processing, and adherence to surcharge compliance allow organizations to further optimize financial operations.
