APEX for Construction

APEX for Construction is a comprehensive solution designed for modern construction businesses. It combines powerful software with expert implementation and ongoing support, delivering real-time project visibility, financial control, and field collaboration.

APEX empowers teams to streamline operations, manage budgets, schedules, and resources efficiently while driving profitability and growth across every phase of construction.

Construction Accounting and Operations

Delivered on time, on budget, risk-free.

APEX for Construction delivers a complete, purpose-built solution that combines essential financial and operational capabilities into one integrated platform. Designed specifically for construction businesses, it includes everything needed to manage projects, accounting, compliance, and field operations—right out of the box. As you outgrow entry-level systems like QuickBooks, APEX provides the tools to manage increasing complexity without skipping a beat.

With pre-packaged software, implementation services, and ongoing support, APEX reduces complexity and accelerates time to value. Its built-in tools are tailored to construction workflows, helping teams improve visibility, automate manual processes, and maintain control over budgets and timelines. This all-encompassing approach enables companies to focus on building, rather than managing disconnected systems.

THE IDEAL APEX FOR CONSTRUCTION CUSTOMER:

- Are small to midsized contractors outgrowing basic accounting software.
- Need to connect disparate systems for a single source of truth.
- Have an accountant or operational leader who will be the APEX champion.

APEX Deployment is ideal for companies seeking an easy-to-use, streamlined solution. If your needs involve highly customized code or complex third-party integrations, other Acumatica options might better meet those needs. APEX provides flexibility as your construction company grows and evolves, enabling you to seamlessly switch to a more advanced software package when the time comes.

“With Acumatica, we have access to current data that helps us understand where our business is coming from, how profitable it is, and just where it stands at any point in time.”

—Eric Hugunin, COO, Phoenix Renovation and Restoration

INCLUDED IN APEX

Financials

Acumatica Financials simplifies the management of business assets, income and expenses with robust financial processes and reporting features. Automated and customizable workflows streamline financial operations.

Construction Project Accounting

Gain visibility across projects, finance, customer accounts, inventory, and related business processes. Project accounting data is integrated across Acumatica applications.

Construction Foundation

Manage construction processes including subcontracts at the project level and change management such as lien waivers, insurance policies, and safety notices. Get construction-specific reports, such as AIA, work in progress (WIP), construction bonding, and substantiated billing.

AP Document Recognition

Easily manage AP workflows, from entering an invoice through approval routing and checks.

Acumatica Payments

Connect to financial and banking networks to conduct secure, compliant, and low-cost credit card, ACH, and Electronic Funds transfers.

Order Management (POs)

Link sales orders with purchase orders and allocate received items to orders. Create requests for vendor quotes with bidding and configurable approval workflows.

Timecards

Capture employee or crew time for projects, services, and payroll with time entry and flexible approval workflows.

Multi-Factor Authentication

Advanced authentication and role-based security ensure employees have access to the data they need to perform their jobs.

Monitoring and Automation

24/7 monitoring by enterprise level security tools and software to prevent, detect, and address any security threats. Automate manual processes with customizable workflows.

Advanced Customer Care

Once your business is live on Acumatica, Advanced Customer Care (ACC) gives you direct access to experts for support, tailored guidance, and ongoing system optimization, transforming your ERP platform into a true growth engine. ACC helps you maximize ROI, boost user confidence, and keep your system aligned with your business needs. The Assisted (ACC-1) tier offers premium support, including 24x7 coverage, annual system health checks, guided upgrades, and up to two service initiatives* each month. With ACC-1, your system stays optimized, your team empowered, and your business prepared for what's next.

***Service initiatives include:** Case management, business event setup, feature-based training, email notification setup, dashboard creation and design, import/export scenarios, feature enablement, performance troubleshooting, feature documentation, and new module evaluation to drive progress with focus and flexibility.

APEX OPTIONAL FEATURES

Construction Project Management

Easily manage project operations using real-time daily field reporting with change management and RFIs.

Bank Feeds

Streamline bank reconciliation and expense management.

Advanced Expense Management

Process expense receipts and claims with corporate credit cards, including advanced processing and receipt recognition.

ABOUT ACUMATICA

Acumatica Cloud ERP is a comprehensive business management solution that was born in the cloud and built for more connected, collaborative ways of working. Designed explicitly to enable small and mid-market companies to thrive in today's digital economy, Acumatica's flexible solution, customer-friendly business practices, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
