Distribution Accounting and Operations

From Warehouse to Customer, Delivered Risk-Free.

APEX for Distribution delivers a complete, purpose-built solution that combines essential financial and operational capabilities into one integrated platform. Designed specifically for growing distributors, it includes everything needed to manage inventory, accounting, and sales, right out of the box. As you outgrow entry-level systems like QuickBooks, APEX provides the tools to manage increasing complexity without skipping a beat.

With pre-packaged software, implementation services, and ongoing support, APEX reduces complexity and accelerates your time to value. Its built-in tools are tailored to distribution workflows, helping your teams improve visibility, automate manual processes, and maintain control over costs and fulfillment timelines. This all-encompassing approach enables your company to focus on delivering for your customers, rather than managing disconnected systems.

THE IDEAL APEX FOR DISTRIBUTION CUSTOMERS:

- Are small to midsized distributors outgrowing basic accounting software.
- Need to connect disparate systems for a single source of truth.
- Have an accountant or operational leader who will be the APEX champion.

APEX Deployment is ideal for companies seeking an easy-to-use, streamlined solution. It provides the flexibility your distribution company needs to grow and evolve, enabling you to seamlessly switch to a more advanced software package when the time comes.

“Previously, what would happen every quarter or month is that we’d go into QuickBooks. And then look up our FOB (freight on board) and then we’d have a total freight and total duty figures. We could get an overall gross margin. But now we can get a gross margin on every individual style instantly. We can also drill into purchase orders to look at notes whereas it would take me three or four steps previously.”

— Bruce Cohen, President, Boca Terry

INCLUDED IN APEX

Distribution

Sales Orders: Efficiently set up and process customer orders, including blanket orders, while maintaining oversight through single-level approval maps. Simplify fulfillment by enabling your team to manually pick, pack, and ship products with a seamlessly integrated shipping carrier (choose one).

Purchase Orders: Acumatica's Purchase Order module streamlines your procurement strategy by automating purchasing tasks and enforcing workflows to ensure cost control. It empowers your team to manage vendor relationships effectively and track orders in real time, ensuring critical materials arrive exactly when needed.

Inventory Control: Efficiently manage your inventory with features that allow you to set preferences, manage stock, and define transaction posting, item classes, lot and serial parameters, and units of measure. Handle operations in a single warehouse with basic physical counts to keep your stock aligned.

Financials

Core Financials: Manage assets, income, and expenses with robust, customizable financial processes and reporting features.

AP Document Recognition: Streamline AP workflows from invoice entry through approval and payment, while reducing manual data entry.

Acumatica Payments: Integrate with financial networks for secure credit card, ACH, and EFT transactions.

Platform Features

Multi-Factor Authentication: Ensure security with advanced authentication and role-based access.

Monitoring and Automation: Experience 24/7 monitoring and customizable workflow automation for efficiency and security.

Customer Support & Services

Advanced Customer Care: Once your business is live on Acumatica, Advanced Customer Care (ACC) gives you direct access to experts for support, tailored guidance, and ongoing system optimization, transforming your ERP platform into a true growth engine. ACC helps you maximize ROI, boost user confidence, and keep your system aligned with your business needs. The Assisted (ACC-1) tier offers premium support, including 24x7 coverage, annual system health checks, guided upgrades, and up to two service initiatives* each month. With ACC-1, your system stays optimized, your team empowered, and your business prepared for what's next.

***Service Initiatives include:** Case management, business event setup, feature-based training, email notification setup, dashboard creation and design, import/export scenarios, feature enablement, performance troubleshooting, feature documentation, and new module evaluation to drive progress with focus and flexibility.

APEX OPTIONAL FEATURES

Shipping Carrier Integration

Reduce costs, improve customer satisfaction, optimize shipments, and enhance operational efficiency with multi-carrier shipping.

Bank Feeds

Streamline bank reconciliation and expense management by connecting directly to your financial institutions to pull transactions into the system for reconciliation.
