Empower Every Employee with an Adaptable Business Application

Acumatica is different by design. We're built on the conviction that thriving small and midsize businesses are the heart of the modern, digital economy—and they need tools that empower every person to innovate, collaborate, and anticipate what's next.

The Acumatica Cloud ERP platform is built on the world's best cloud and mobile technology, providing the tools business users need to reimagine an interconnected world. The evolving architectural framework and application platform are driven by user feedback, empowering business users to tailor the system with predefined security roles and low-code / no-code customization tools for a personalized ERP experience.

Empower every employee with unlimited user licensing and get more done with personalized workspaces and side panels to access related information without leaving the screen. The modern and intuitive user interface and comprehensive user help system improve user adoption while reducing employee on-boarding and retraining.

Acumatica's mobile application framework empowers remote workers with native apps for expense reporting, time entry, mobile dashboards, supervisory approvals, and functional apps for warehouse users, sales executives, manufacturing employees, and executives.

Accelerate decision-making with configurable analytic and reporting tools that deliver personalized views of your business to every department with drilldowns to source transactions and business events for notifications. Tailor no-code reports, flexible inquiries, and role-based dashboards with secure access to sensitive information.

"Acumatica has exceeded our expectations. From a technology and operations point of view, Acumatica ticks all the boxes: It's engaging for users, scalable, flexible to meet your needs, and grows with you as a business."

–Chris Drake, Chief Technology Officer and Chief Operating Officer

> CUSTOMER STORIES

Digital Transformation

Maximize your ERP software investment. Acumatica's products and platform undergo continuous investment and improvement, ensuring no customer is left behind.

Superior Usability

Design and manage custom UI elements and dashboards with side panels that let users view and edit related data without leaving the screen. Acumatica's intuitive menu navigation reduces learning curves and accelerates adoption across teams and partners. Customers consistently rank Acumatica highest for usability in leading analyst reports and industry reviews (including G2, Nucleus Research, Info-Tech, and Software Reviews).

Global Solution

Built for domestic and global small to mid-sized organizations, Acumatica supports multi-company, multi-currency, and multi-tenant operations with built-in cultural, language, and international tax compliance capabilities. The user interface and wikis can be maintained in multiple languages, with U.S. English and French-Canadian available out of the box.

Best-In-Class Industry Editions

Born in the cloud, industry editions extend the value of Acumatica cloud ERP with solutions built specifically for manufacturing, construction, distribution, retail, professional services, and general business organizations.

Customizable Data Models

With extensible data models, users can add unlimited objects, fields, and relationships, defining business rules to support any monetization model through the built-in customization module.

Configurable Workflows and Alerts

Configure workflows to reflect how your business operates. Define approval and assignment rules, and create event-based alerts for exception management. Notify users via email, mobile, SMS, or Microsoft Teams using ERP-driven templates with dynamic links for quick action.

Modern Security

Feel confident your data is secure. Acumatica delivers enterprise-grade security with server-side processing, granular and role-based access controls, and built-in two-factor authentication, backed by a comprehensive security model that protects applications, data, reports, and devices end-to-end.

Single Sign-on (SSO)

Simplify user security with silent logins to Acumatica using Microsoft Active Directory, Azure Active Directory, Microsoft Live ID, or Google OAuth 2.0 client IDs. System administrators can also configure Acumatica access through Okta, OneLogin, or other OpenID provider portals.

Reporting and Analytics

Access hundreds of standard reports out-of-the-box and tailor them to your organization. Quickly create new tailored reports, pivot tables, generic inquiries, and business intelligence dashboards for real-time, actionable insights without coding. Utilize our seamless integration with Microsoft Power BI for additional insights via robust analytical tools.

Unlimited User Licensing

Acumatica's growth-friendly licensing model enables businesses to provide access to every employee without additional costs. Businesses can provide access for full-time employees, part-time help, seasonal workers, customers, vendors, tax accountants, consulting organizations, and more.

Dual Layers of Support

We have your back. Customers have access to Acumatica support in addition to their certified implementation partner. We work in tandem with your local partner to solve any issue or challenge that may arise.

On-the-Go Mobility

Work from anywhere, anytime. The native Mobile ERP application supports iOS or Android devices. Take advantage of various screen sizes, orientations, and resolutions. Capture and attach expense receipts, time entries, and electronic signatures on the go, collaborate across teams, and foster proactive decision-making. Use your phone to record field notes. Personalize the display with your favorite links, widgets, workspaces, dashboards, and reports.

Government Ready

Government agencies and related public-sector organizations can host Acumatica on a private cloud or via Acumatica's public cloud on Amazon Web Services (AWS). Customers can also use Amazon's GovCloud platform for compliant data security and ITAR compliance.

Industry Compliance Manageability

Acumatica is designed to support regulatory and industry compliance across a broad global business landscape, including GAAP, IFRS, SOC 3, GDPR, and other applicable standards, helping customers meet governance, risk, and compliance requirements worldwide.

Essential Scalability

Growing businesses need technology that adapts to changing workloads and business expansion. Acumatica is engineered to meet the needs of smaller organizations and address the complex requirements of rapidly growing companies or seasonal businesses—allowing them to expand on their terms.
