

Shop Floor Kiosk

Experience true shop floor efficiency with a modern, intuitive system that streamlines data capture and empowers your production team.

- **Simplify production reporting workflows**
- **Track labor in real-time**
- **Monitor WIP activities across your facility**
- **Visualize progress with color-coded cues**

Key business benefits

- Increase operator productivity with streamlined workflows.
- Accelerate employee onboarding.
- Minimize errors through guided, role-based access.
- Provide real-time visibility into production operations.
- Enhance reporting consistency and accuracy.
- Reduce shop floor data entry.
- Empower teams with instant access to information.

A Modern, Affordable, and Intuitive App for Every Shop Floor Worker

Acumatica's Shop Floor Kiosk is a modern, intuitive interface designed to empower your manufacturing workforce. Built for real production environments, it provides a simplified experience that captures production data directly as it happens on the floor. Shop Floor Kiosk is an alternative to the existing Manufacturing Data Collection (MDC) application that streamlines operations with a user-friendly design focused on the essential tasks of your production team.

This powerful tool gives your operators a clear view of their work, eliminating the complexity of a full ERP menu. By presenting only relevant tasks based on employee roles and active operations, the kiosk helps reduce errors, minimize training, and improve the consistency of production reporting. Empower your team with a solution that lets them spend less time on data entry and more time on productive work.

Shop Floor Kiosk Features:

- **Simplified, role-based interface:** Show only relevant tasks to each user.
- **Real-time labor tracking:** Clock work for instant, accurate data.
- **Effortless material transactions:** Issue materials and track with traceability.
- **Intuitive progress visualization:** Instantly see performance with color cues.
- **Easy Document Access:** View instructions and attachments on demand.
- **Review Recent Activity:** Check work history in just one click.

"For us, the power of the Acumatica system is in the WMS and shop floor data collection, the inventory management, the ability to deliver to a customer, and to get things right."

Role-Based Task Visibility

Display only the most relevant tasks and operations to each worker based on role, work center, and production status, keeping focus on what matters most.

Real-Time Labor Tracking

Enable operators to clock in and out of operations, automatically recording labor data to boost accuracy and reduce manual entry.

One-Touch Production Reporting

Allow fast entry of completed quantities or report scrap and finish times directly at the kiosk, ensuring timely production updates.

Effortless Material Issuance

Issue single materials quickly or in bulk, with full support for lot and serial tracking, warehouse locations, and inventory returns.

Guided Checklists and Work Instructions

Empower workers with step-by-step checklists, safety guidelines, and setup instructions, all accessible directly from the kiosk.

Easy Document and Multimedia Access

Provide access to work instructions, CAD drawings, videos, and related attachments at the point of use to improve context and reduce errors.

Intuitive, Color-Coded Visuals

Visualize progress with color cues and real-time graphical metrics, helping workers gauge performance against targets immediately.

Work in Process Activities

Display current operations at a glance, so shop floor users always see what's in progress and can easily navigate to reporting screens as needed.

Recent Activity Review

Give operators, supervisors, and teams access to a clickable history of recent actions performed on the shop floor.

Flexible Scrap Reporting

Enable workers to record scrap quantities with optional reason codes, supporting continuous improvement and deeper analysis.

Easy Integration and Data Flow

Automate the flow of shop floor data into Acumatica's manufacturing, inventory, and financial modules, ensuring accuracy and up-to-date information across the business.

The screenshot displays the Acumatica Shop Floor Kiosk interface. The top section, titled "Operations In Progress", shows a table with columns for Employee, Production Nbr., Work Center, Work Center Description, Operation, Operation Description, Completed Qty., Remaining Qty., Planned Labor Time, Finish Time, Remaining Time, and Queue Time. The table lists three operations: Eric Cozzi (Packing), Eric Killian (Assembly), and Neil Frerichs (CNC Workcenter). Below the table, a "Report Quantities for RO AM000048 - Assembly" dialog is open. It features a "COMPLETED" tab and a "SCRAPPED" tab. The "COMPLETED" tab has a text input field for "Completed Qty. to Report" with the value "1" and a "Set to Remaining Qty." button. The "SCRAPPED" tab has a text input field for "EA" and a "Set to Remaining Qty." button. A "Totals" section on the right shows: Completed Qty. 0.00 EA, Scrapped Qty. 0.00 EA, and Remaining Qty. 25.00 EA. The "Report" and "Cancel" buttons are at the bottom right.

Employee	Production Nbr.	Work Center	Work Center Description	Operation	Operation Description	Completed Qty.	Remaining Qty.	Planned Labor Time	Finish Time	Remaining Time	Queue Time
Eric Cozzi	AM000174	WCSH70	Packing	0020	Packing	40.00	460.00	00:00	00:00	-53:74	00:00
Eric Killian	AM000002	WC10	Assembly	0010	Assembly	5.00	5.00	01:00	00:00	-53:70	00:00
Neil Frerichs	AM000179	WC20	CNC Workcenter	0010	CNC Workcenter	0.00	1.00	00:01	00:00	-58:54	00:00
