Acumatica + ADP

Better Together ERP and HCM

Streamline Manufacturing Operations and Workforce Management with a Modern Cloud Platform

To scale production efficiently and boost profitability, manufacturers must streamline how they manage both their workforce and operations. When workforce management and ERP solutions are used together, organizations can gain greater visibility into human resources, payroll, financials, production, and timekeeping data, helping leaders make more informed business decisions.

These technologies help reduce manual processes, reduce administrative overhead, and improve accuracy across manufacturing, human resources, and finance functions. With real-time insights into labor costs, workforce productivity, operational performance, and compliance, leaders can make faster, smarter decisions that increase efficiency, improve margins, and support sustainable growth.

By considering workforce management alongside operational and financial performance, manufacturers can operate more efficiently, adapt to changing production demands, and gain a competitive edge in today's dynamic manufacturing environment.

Unified Data, One Source of Truth

Acumatica + ADP brings financials, HR, payroll, and timekeeping together in a single, unified platform—delivering real-time visibility into labor costs, workforce productivity, and performance. This integrated approach eliminates data silos and empowers decision-makers with accurate, up-to-date insights across departments.

Automated processes reduce the risk of human error in critical areas such as tax calculations, benefits deductions, job costing, prevailing wage and union calculations, certified payroll, and labor law compliance—helping organizations maintain regulatory standards, avoid costly penalties, and operate with greater confidence.

"It's a fast, easy, intuitive view for any user especially for those in commercial management who need to take quick action. That alone added extra stars compared to previous solutions."

– Jose Ramos, Assistant Sales Manager, Tutto Pelle

Centralized Workforce Data

Eliminate data silos by seamlessly syncing employee records, payroll, time tracking, and financial data between ADP and Acumatica. This integration ensures HR and finance teams are always working from the same accurate, up-to-date information—improving collaboration, reducing errors, and enhancing decision-making.

Custom workflows can be configured to trigger alerts, approvals, or automated actions based on key events—such as onboarding a new employee, processing payroll, or flagging compliance issues. This reduces administrative overhead, ensures timely execution, and keeps your operations running smoothly.

ADP		Acumatica
Payroll Journal Entries	→	Journal Transactions
People Date/Data Changes	→	Employee Records
Timecard Data	⇄	Time Activities
Labor Charge Fields	←	Project Field Values
Expense Reimbursements	←	Expense Claims

Streamlined Operations & Automation

Automated data flows eliminate manual entry, reduce errors, and accelerate mission-critical processes. With real-time synchronization of time and attendance data, you can enable accurate payroll processing, precise job costing, and seamless project accounting—while ensuring data consistency across every department.

Finance, HR, and operations teams benefit from a unified, synchronized system that minimizes administrative overhead and frees up resources for higher-value initiatives. By streamlining operations through intelligent automation, your business can scale faster, adapt more easily to change, and maintain a lasting competitive edge.

Real-Time Compliance & Audit Readiness

Stay ahead of shifting regulations with real-time compliance monitoring and built-in audit readiness. The integration of Acumatica and ADP ensures compliance-related data is always accurate, up to date, and easily accessible across your organization.

Automated workflows and embedded controls streamline regulatory reporting, while real-time dashboards deliver instant visibility into labor costs, workforce metrics, and compliance status. By eliminating manual data consolidation, you reduce delays, minimize risk, and respond to audits with speed and confidence.

This proactive, automation-driven approach not only reduces exposure to penalties but also strengthens your compliance posture—empowering your teams to focus on strategic priorities, not paperwork.

> “Before Acumatica we had a lot of different systems not talking to each other, which meant we had to log in and check, go to another, maybe go to five systems to be able to get the information we needed.”

– Jennifer Pellechio, Director of IT, Storm Smart

Scalable, Cloud-Native Architecture

Fuel sustainable growth, maximize productivity, and stay ahead of compliance demands with a flexible, cloud-native ERP solution that scales effortlessly with your business. Whether you're expanding into new markets, onboarding distributed teams, or increasing headcount, this adaptable platform evolves with you—without adding complexity.

Automated workflows and real-time data synchronization eliminate manual oversight, reduce administrative burden, and ensure data accuracy across your organization. With centralized controls and audit-ready reporting built into the system, you can confidently meet regulatory requirements—no matter how complex your operations become.

This scalable, compliance-first approach empowers your teams to shift their focus from routine tasks to strategic initiatives—driving innovation, agility, and long-term success.

Empower the Employee Experience

Empower employees with a seamless, modern experience through integrated self-service portals that allow them to view pay stubs, manage benefits, submit time-off requests, and track hours—all from a single, intuitive interface.

Real-time synchronization between ADP and Acumatica ensures accurate time and attendance tracking, feeding directly into payroll and project costing. This reduces errors, minimizes disputes, and builds trust across the organization.

With mobile access, employees and managers can stay connected and productive from anywhere—supporting hybrid work environments and improving responsiveness. Integrated communication tools keep everyone informed with timely updates on schedules, pay, and benefits, while streamlined approval workflows accelerate decision-making and reduce bottlenecks.

By aligning employee data with financial and operational systems, businesses gain deeper insights into workforce performance, enabling smarter talent development and fostering a culture of engagement, transparency, and growth.

Ready to simplify, scale, and move faster? **Let's connect.**

ADP is a comprehensive global provider of cloud-based human capital management (HCM) solutions that unite HR, payroll, talent, time, tax and benefits administration and a leader in business outsourcing services, analytics and compliance expertise.
